Google Chrome Built-in AI Challenge 2025

User Guide

Features

- **AI Writer**
- **AI ReWriter**
- **AI ProofReader**
- **Context Based Writing**
- **AI Cover Letter Writer**

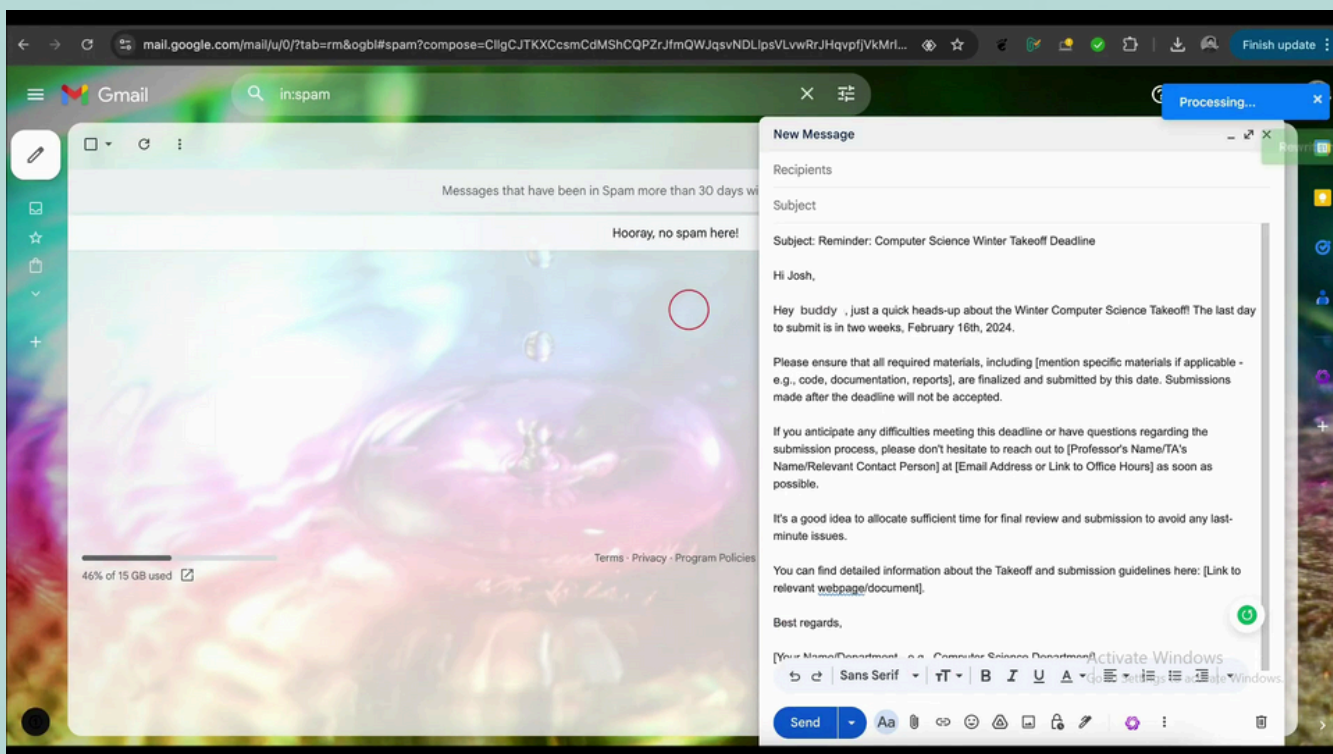

AI Writer

1. Select the Input Box
2. Press **CTRL+Q** to enable the voice command
3. Instruct the AI to write, you can also specify the tone, in which you want to write. Default Tone is set to **Professional**. For example: “Write an email to teacher for an extra class on Thursday.”
4. Wait for a while and see the magic

AI ReWriter

Select the text, press
CTRL+Q and Instruct the
AI to rewrite

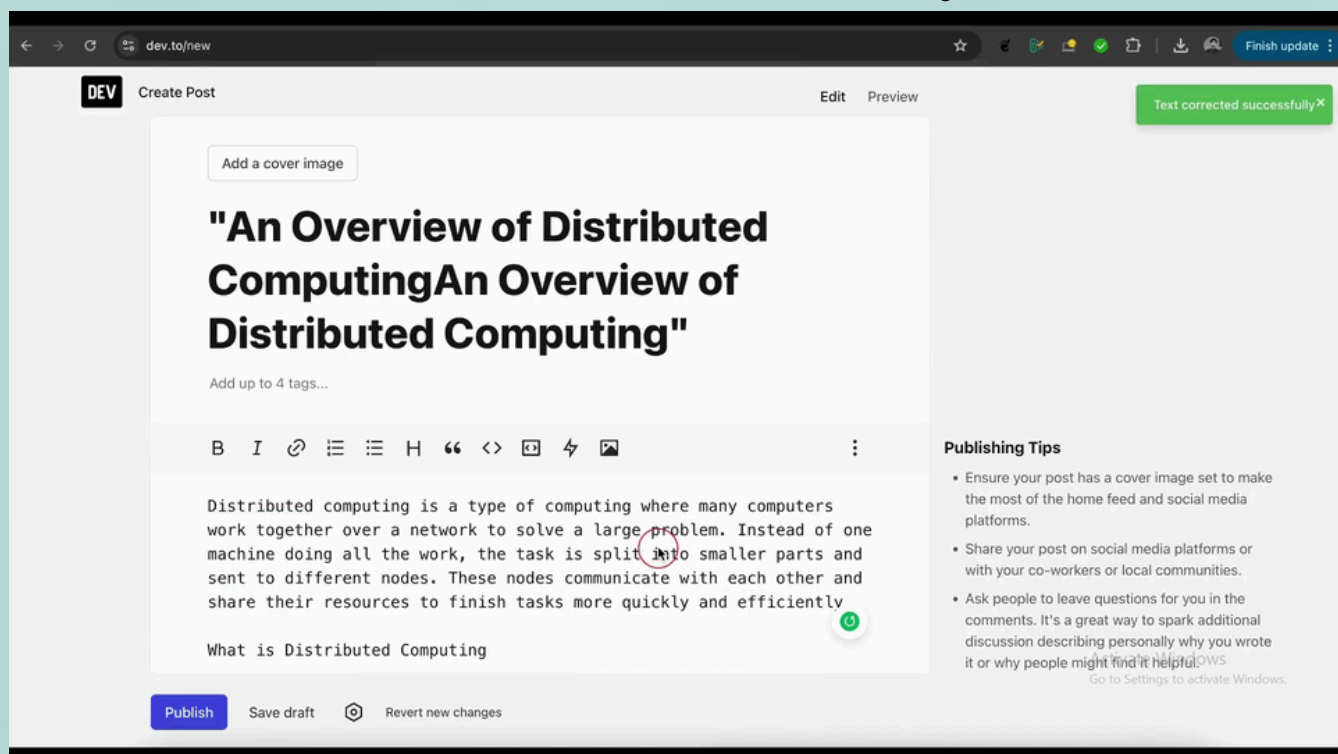

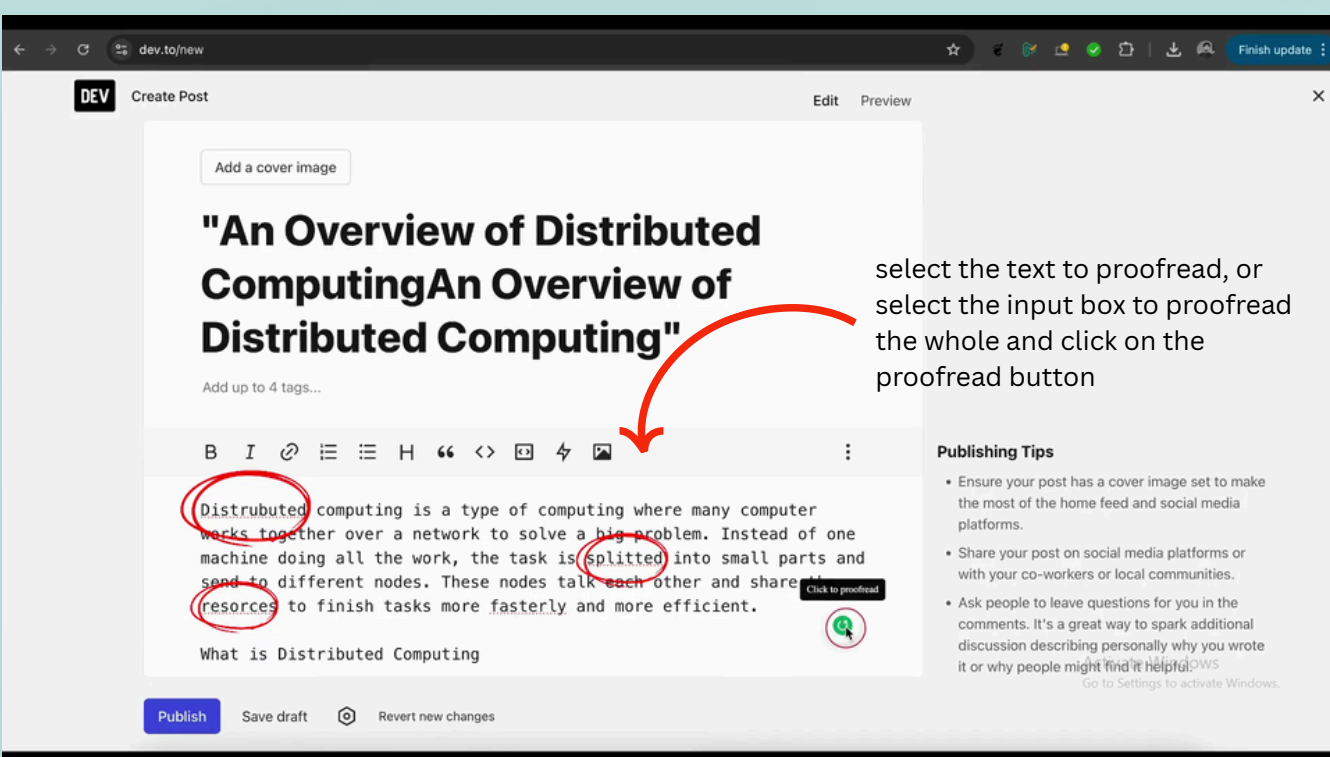

1. Select the text you want to rewrite
2. Press **CTRL+Q** to enable the voice command
3. Instruct the AI to rewrite the selected text.

Here also, you can specify the tone in which you want the text rewritten. By default, the model will analyze the tone and rewrite in the same tone.

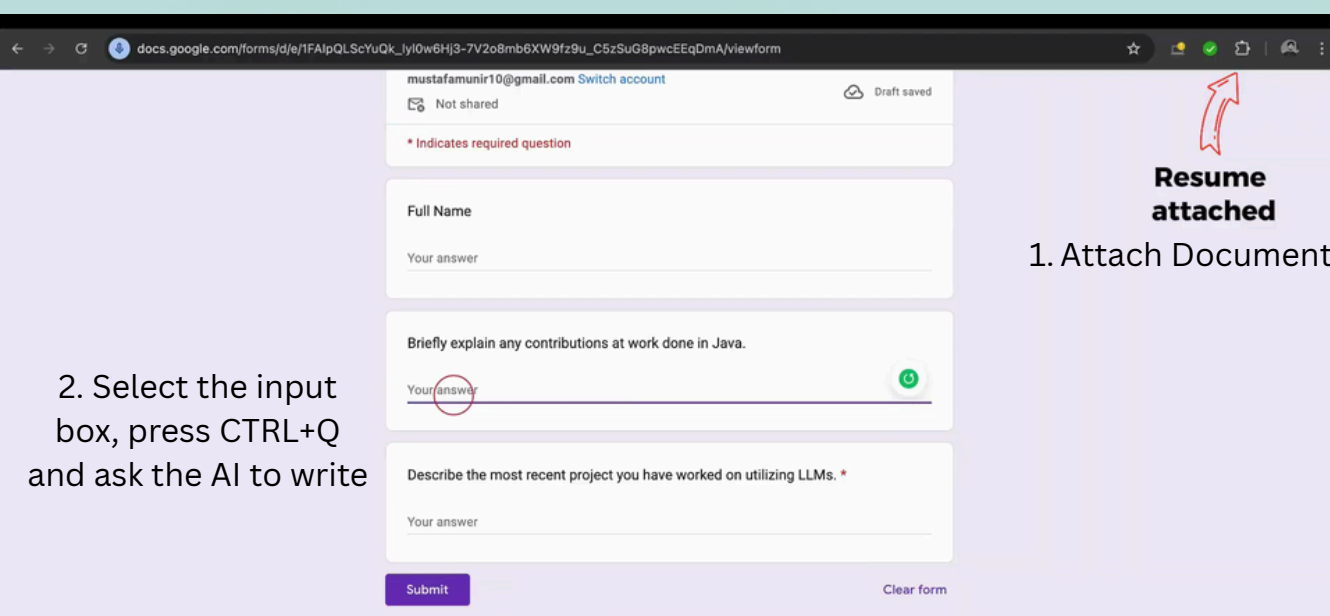

4. Wait for a while and see the magic

AI ProofReader

1. Select the input box.
2. Select the text to proofread, or no need to select the text if you want to proofread the whole input box.
3. Your text will be proofread.

Context Based Writing

Full Name

Your answer

Briefly explain any contributions at work done in Java.

During my time at Techwards, I contributed to project Kestra by making three open-source contributions using Java. I focused on improving the project's functionality and stability. I also added test cases using Pytest and Swagger API documentation to two projects, ensuring better code quality and documentation. Furthermore, I performed AML analysis of cryptocurrencies in Databricks for two clients, leveraging my Java skills to analyze complex financial data.

Describe the most recent project you have worked on utilizing LLMs. *

1. Attach the document.
2. Select the input box
3. Now enable the voice command using **CTRL+Q**.
4. Instruct the AI to write using your voice — for example: “*Write a summary based on this document*”
5. AI will write on your voice command using the info provided in the document

AI Cover Letter Writer

1. Attach your resume.
2. Select the input box
3. Click on the “**Write/Download Cover Letter**” button.
4. The AI will first extract the Job Description, analyze it, and will write a cover letter tailored according to the job description
5. If no input box is found, generated cover letter will be downloaded.
